

## **POCKET VERIFIER PROFESSIONAL ATTAINS MICROSOFT POCKET PC 2002 CERTIFICATION**

*Advanced Merchant Solutions, Inc. through their MerchantAnywhere.com merchant portal announced that their “**Pocket Verifier Professional – Pocket PC Edition**” successfully meets the requirements of the “Designed for Windows for Pocket PC 2002” Logo Program from Microsoft. The logo program allows end-users to easily identify software products that are compatible with Microsoft Windows Powered Pocket PC 2002 devices and that incorporate new functionality featured in Pocket PC 2002, where applicable.*

Fullerton, CA – June 6, 2003 — Advanced Merchant Solutions, Inc., a world leader in Merchant Banking solutions, has announced that **Pocket Verifier Professional – Pocket PC Edition** successfully meets the requirements of the “Designed for Windows for Pocket PC 2002” Logo Program from Microsoft. The logo program, independently verified by Quality Logic of Moorpark, CA., allows end-users to easily identify software products that are compatible with Microsoft Windows Powered Pocket PC 2002 devices and that incorporate new functionality featured in Pocket PC 2002.

“QualityLogic Inc.’s participation is an absolutely vital component of the Microsoft Mobile2Market logo program,” said Shreedhar Madhavapeddi, program manager for the Mobility Group at Microsoft Corp.” Pocket Verifier Professional allows merchants to wirelessly receive credit card authorizations and perform electronic funds transfers. According to Dr. Blaine Leckett, CTO of Advanced Merchant Solutions, Inc., “We’re pleased that Pocket Verifier has achieved this important distinction from Microsoft with QualityLogic’s testing services. Logo testing was completed in a matter of days, and QualityLogic kept us informed every step of the way.”

QualityLogic’s independent certification testing gives developers of “Designed for Windows for Pocket PC 2002” applications an edge in the market, since buyers know that certified applications are fully functional on Microsoft Windows Powered Pocket PC 2002 devices and were designed to take advantage of the unique benefits of running on these devices.

Pocket Verifier’s successful logo certification testing by QualityLogic provides a level of differentiation from their competition and assures buyers they are getting a product that meets Microsoft’s stringent requirements,” said Dennis Ideue, CEO, AMSI.
