At last, Merchant Terminal software for the popular Palm™ OS! The small footprint packaging is designed for the smaller PDA display areas, allowing the retailer to maximize their shelf space, and display the product right next to the PDA's themselves.

Reseller Benefits

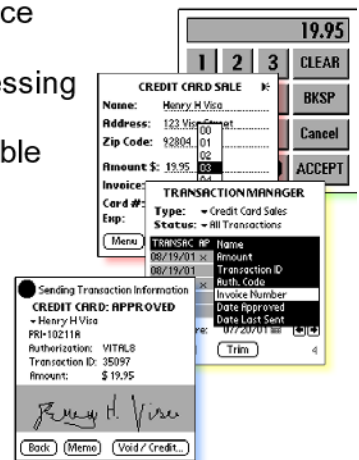

Pocket Verifier Professional Edition is a business application that helps businesses grow with mobile commerce, stimulating sales of:

- PDA's with Expansion Capability
- Wireless Modem Cards / Modules (Visorphone™, Omnisky™, etc.)
- Credit Card / Check Readers
- Conventional Modem Cards / Modules
- IrDA Portable Printers (A6™, Canon™, HP™)
- Cellular / PDA combo units (Kyocera™, Samsung™, & others).
- Wireless Service Agreements
- PDA Insurance / Service Agreements

Description & Features

Pocket Verifier Professional has features normally found on \$2000 wireless terminals, such as the Nurit 3010 and LinkPoint 9000, but it also offers the functionality and versatility of the wireless Palm platform, at a fraction of the cost. Minimal investment with full capability is our most important feature, but not to be overlooked, we also offer:

- Instant Wireless Credit Card Acceptance
- Fully Encrypted Transactions
- Swiped and Manual Transaction Processing
- Address Verification System (AVS)
- Check Reader & Receipt Printer Capable
- Magnetic Card Reader Support
- Electronic Check Acceptance
- On Screen Signature Capture
- Transaction Database Storage
- Store and Resubmit Transactions
- Training Mode with Test-only Account
- Pre-approved, Flat-Rate Account
- Multiple PDA's on a single account
- Multiple Accounts on a Single PDA
