

# Pocket CrossCheck

## Check Guarantee Software

When you are out in the field, you can use any wireless Palm OS compatible PDA to get an immediate check authorization from the powerful CrossCheck™ check guarantee service! You can enter the information with your stylus, or you can use the Semtek PDA Swipe™ or SideSwipe™ magnetic card readers to take the information right off the magnetic strip on the back of their driver's license (specific states only, look on the back of your license for a black stripe to see if your state has this feature).

All businesses that accept checks encounter bad checks and the collection hassles that go with them. As a merchant, if you try to control check problems by limiting check acceptance, you are turning business away. The solution is to increase check acceptance with check guarantee.

Pocket CrossCheck was developed with the full cooperation of CrossCheck, Inc., for complete compatibility with your CrossCheck account! Pocket CrossCheck is a complete solution for your check acceptance needs, backed by one of the largest check guarantee institutions in the world! You cannot find a better package anywhere.
