

Pocket CrossCheck

Pocket CrossCheck not only provides real-time check guarantee for mobile commerce, but also includes Transaction Manager. Transaction Manager is a sophisticated transaction processing center that allows you to quickly view all your checks and instantly see which transactions have not yet been approved, so you can resubmit them.

Organize sales by Name, Amount, ID, Authorization, Invoice, Approval Date, or Last Transmission Date. The transaction list provides a quick overview of when a transaction occurred and if it has already been approved!

Get Check Guarantees in seconds!
Make the sale wherever you are.

Capture the customer's signature on the PDA screen.
