

# PC Verifier™

## Professional

### ACCEPT CREDIT CARDS ON YOUR PC!

PC Verifier Professional is an innovative Windows application to provide instant credit card authorization, as well as checking account transfers via ACH. PC Verifier has full support for both keyed and swiped transactions, with Sale, Credit, and Void functions. Also included is a complete transaction database manager and reporting system.

The retail version of PC Verifier is bundled with a magnetic stripe reader for swiped transaction processing

PC Verifier Professional supports the largest array of peripherals ever! From the included (via coupon redemption) magnetic card reader to MICR check readers or advanced check imaging products, signature capture pads, barcode readers, PIN pads, receipt printers, and more! PC Verifier Professional even provides an optional interface to the CrossCheck check guarantee system for the ultimate in check acceptance. PC Verifier Professional also includes our critically acclaimed pre-approved\* merchant account provided through Key Bank. PC Verifier Professional offers credit card and e-check acceptance with features and capabilities that no standard merchant terminal can offer, using your PC and its Internet connection for instant authorizations! PC Verifier Professional is the easiest, least expensive, and fastest way to accept credit cards.

PC Verifier Professional was designed to help individuals in almost any field to process credit card transactions without high upfront costs.

# PC Verifier™

## Professional

### ACCEPT CREDIT CARDS ON YOUR PC!

PC Verifier Professional turns your Internet connected PC into a fully functional merchant terminal with a complete graphic interface, on-screen and printed reports, and much, much more!

### POWERFUL FEATURES:

PC Verifier Professional is designed to make credit card acceptance fast, easy, and simple. We will set up your merchant account (subject to underwriting), with absolutely NO application, setup, or cancellation fees, and NO term commitment! Absolutely nobody makes it easier!

- Accepts all Major Card Types
- Sale, Credit and Void functions
- Payments authorized in seconds
- Electronic Check Acceptance
- Transaction Database & Manager
- Fully Encrypted Transactions
- Magnetic Card Reader included
- Windows Receipt Printing
- Optional signature capture
- Complete Reporting System
- Multiple levels of access
- Low Swiped rate of 1.69%
- No merchant set-up fees
- No term commitment

### CARD READER FOR SWIPED RATES!

PC Verifier Professional includes your choice of card readers to match your system. You can select either RS-232 (9-pin) serial, or USB. Using a card reader has three major benefits: First, using it qualifies you for the 'swiped' or retail rates (1.69% vs 2.20% for keyed). Second, swiping the card creates a 'card present' transaction which along with a signature can help protect you from chargebacks. Third, swiping the card is 3 to 10 times faster than keying in the transaction, giving you more time to spend on your sale, instead of the transaction.

### PDA BONUS!

Included on the CD-ROM is our critically acclaimed, Pocket Verifier software for Palm OS and Pocket PC based wireless PDA's! Use the software alone for keyed transactions, or add one of our PDA based card readers for swiped transactions! Pocket Verifier Professional has won numerous awards, including Handheld Computing Magazine's "Top Pick", for both it's technology and the incredible merchant services!

Now you can accept credit cards ANYWHERE!
