

Pocket Merchant

Combination Card reader and Thermal Printer

Includes: Leather case w/ belt clip, charger, data cable and paper!

Announcing a complete breakthrough in mobile printer design!

A true Line Printer (the paper moves underneath a motionless head), rated not in characters, but MILES of paper in reliability (31 to be precise)! Powered by powerful, built-in Nickel - Metal Hydride rechargeable batteries, this printer literally throws receipts out at up to 2 inches per second! All this in a printer that is shorter and narrower than most PDA's, and only one inch thick!

This device will easily fit in a pocket or purse, and weighs just 7 oz. Pocket Merchant is completely compatible with the entire Palm-based Treo Family of PDA Smartphones.

"It works flawlessly from the very first time you swipe a card, and there's no confusing driver setup. Excellent merchant account; complete suite of tools to manage credit card sales with a Palm.. Just about flawless."

- *Handheld Computing Magazine*

"What sets MerchantAnywhere apart from other credit card solutions is not just the wireless connectivity, as cool as that is; instead, it's also a very user-friendly, affordable merchant account." - *IT World*

"In all, the Ben Taylor Band uses a Treo 300, Pocket Merchant, and MerchantAnywhere's transaction software to sell concert merchandise on the road while the band tours. Sales per customer have gone up as well since adopting the system several months ago. "People tend to buy more when they're using credit. They may not want to part with an extra twenty, but they'll add one or two items to a credit card receipt."

- *Mobility Magazine*

MAC Tools has adopted Pocket Merchant company-wide, and even teaches how to use it at their Training Center. At Mac Tools Corporate, the "Mobile Merchant" coordinator, Dario Dinardo, MAC Card Specialist says: "The professionalism displayed by MerchantAnywhere is first class all the way, I recommend them highly."
